A very reprehensible practice prevalls among some of the banking houses in this city and elsewhere. We mean the stamping of the name and business of the firm on banknotes which pass through their hands. A mo-ment's consideration will show the danger to the credit of houses indulging in the practice, and we wish to suggest that such bankers day, by the limb of a tree under which he was riding, and lifted out of his saddle and nearly strangled before he could be released.

The stamp is a simple stencil, hastily marked on the next stamp is a simple stencil, the would be perfectly easy to imitate it so successfully that no witness before a jury could tell the difference between it and the genuine.

We do not think that a prudent backer will imagine that the notoriety given to his name and business in this manner, should weigh for an instant against the risk which he is cer tainly running in placing such a stamp upon a bank note. Independent of this, it is a reprehensible practice, because it defaces the note, which should not be done.—Philadelphia Evening Bulletin.

> COPYING DAGUERRECTYPES .- Daguerrectypes may be copied by the electrotype process in the following manner:

A portion of the back of the daguerreotype is cleaned by scraping it, or by applying a single drop of nitric acid, which is tehn to be wiped off; a little chloride of zinc is now to put on the clean spot, and a small peice of thin pewter solder. A thickish copper wire, having one end flattened, is now placed in the flame of a candle or lamp, and being brought in contact with the picture, the heat is to be continued until the solder runs. The back of the daguerreotype may now be coated with wax, and may then be placed in the bath to receive the deposit of copper. The electrotype produced in this manner will be found easily separable from the pic-ture, and it is slightly gilt in order to protect it from oxidation. t from oxidation.

Writing from the country this week writing from the country this week and trying to console the poor editors who cannot get away to enjoy its pleasures, Henry Ward Beecher says: "Perhaps it may be of some comfort to you to know that birds are nearly through their song season. It is only in maidenhood and marriage that they sing. Like many another pretty creature upon whose musical education great pains have been be-stowed, birds, after they go to housekeeping, much, and quite forget all their accomplish-ments. The dear little sparrow—the songsparrow-is an exception. This little homel aird sings right through the year, in the green leaf, yellow leaf, and sear leaf."

WHITE FROST IN DOG DAYS .- We learn that this very unusual atmospherical visitation oc-curred last night upon the lower grounds of many localities in different directions. other places heard from, at Ashland, Mass, and Somersworth, N. H., the platforms around the depots were observed to be covered with a thick collection of hoar frost, and spots of it were plainly visible on most of the lines of railroads at the North. It was thought, however, that little damage was done to crops, with the exception of some of the latest sown vegetables, which were of course "nipped in the bud" sufficiently to cause them to wilt under the succeeding sunshine. The frost was, most fortunately, not powerful enough to affect the corn crop.—Boston Transcript, Wedeeday.

There is a very pretty quarrel just now hetween Monseigneur Pinsinnarit, Roman Catholic Bishop of Sandwich, Canada West, and his flock. He is accused of hatred to the Irish forming the great mass of his congregation, of having used deception to induce the Pope to change the seat of the diocese from ndon to Sandwich, and of having swindled he church and appropriated money o it. To these charges the Bishop replies; with regard to the pecuniary accusation, he shows that the diocese is in debt to him £3,318, a deficit accumulated in three years He denounces his flock for refusing to pay the forced contribution levied at the doors of the hurch, and threatens to excommunicate the ffenders.

ACCIDENT TO AN ACTRESS .- Adah WIsanes Meaken was severely injured on the 4th inst., on the Shell Road, New Orle ans. It appears that Adah is the owner of a very fine horse, which she has had in training for the last five years. He is a spirited animal, full of fire, and fond of leaping a five barred gate. On the occasion referred to, Adah was exercising him, as she was wont to do nearly every day, and, in attempting to take him over the tollgate, he baulked, shied, and suddenly threw his rider some twenty feet, severely injuring her for the time being.

An American Eagle for the Emperor of Austria.

A Richmond correspondent of the Peters-

burg Express says: The Virginia Central brought down on its train of yesterday afternoon a rare bird of the eagle species. At the invitation of a friend I visited this natural curiosity to-day. It is of enormous size, resembles the common grey eagle so frequently caught in Virginia, but is bicipitous or double-headed—and in this its peculiarity consists. The two heads are clearly defined, and seem to be perfect in all respects. It receives its food with the same facility in either beak, and apparently hears and sees alike through all its eyes and ears. It was captured when a mere fledgling, near Luray, Page County, by Mr. Joannes Schwartzberger, and has been carefully nurtured and fed by himself and family ever since. Mr. S. has disposed of this curious bird to the Austrian Consul at New York, who intends presenting it to the Emperor Francis Joseph. A more appropriate present could not be made his Royal Highness, and he will, doubtless, prize it highly, national emblem of his vast empirewill recollect— is a double-headed eagle, but we will venture the assertion that this is the first live specimen ever seen. It goes to New York this afternoon by the Adams' Express, and will be sent out thence by one of the early out-going steamers.

American Seamen in France.

By a curious coincidence, the same mail which brought us the news of Mr. Monekton Milnes' motion in the House of Commons for an address to the English Government on the subject of maltreatment of American seamen by American captains in Eaglish ports, brings also to the Courrier des Etats Unis a copy of the Courrier de la Girond, which relates an instance of savage cruelty on board of an American vessel at Bordeaux, in France. The American ship Abby Blanchard has recently been burnt at that port. During the fire something like a mutiny broke out on board, in the course of which " the captain broke the ribs of one sailor with a bar of iron, while the mate struck another sailor with an ax and cut off the toes of his right foot." A French freman, who reof his right foot." A French fireman, who re-monstrated against these brutal acts, was also attacked by these ruffians, but, thanks to his courage and strength, saved himself, and contributed to their immediate arrest. mate shame and burden of such infamous acts as this must fall, as we have already shown, on the ship owners and merchants who commit their vessels and property to the charge of vile and incompetent persons, without one thought of their own heavy responsibility for the treatment of American sailors, and for the honor of the American flag .- New York Times.

The King of Prussia.

As her relations with Austria and Germany grow daily more and more complicated. Prussia begins to find it important to put the su preme authority of the State upon some basis ore durable and solid than a Regency. Almost the whole royal family of Prussia, or at least the Brothers and sisters of King Frederick William IV, are now assembled at Eme to consult upon the disposal of the crown. The Em-Dowager of Russia, the Grand Duchess of Mecklenburg, the Princess Frederic of the Netherlands, the Prince Regent, and the Prince Charles of Prussia, made up the family party. The King's Physicians declare that though His Majesty looks stonter and better than his journey to Italy, his malady has made tar rible progress. Paralysis of several limbs is constantly looked for, and the celebrated oc-ulist, Dr. Graefe, has announced that there is reason to fear that the King will shortly become quite blind. It is a question, therefore, if im-mediate significance in the aspect of European mediate significance in the Sovereignty of Prussia shall pass at once into the keeping of the Prince Regent, or be transferred from bim to Prince Regent, or be transferred from bim to his son Frederick William, the son-in-law of ictoria .- New York Times.

A few days since a shocking accident occurred to George Campbell, at Twelve Poll, above Ceredo, on the Ohio River. He was engaged about a powerful threshing machine. The loose part of his overalls caught in the clevis pin of the joint on the tumbling shaft, a second clutched the cloth upon the revolving shaft in such a manner as to draw him around with it. The shaft makes sixty to eighty revolutions a minute, and, though the machine was stopped as soon as possible, poor Campbell was shockingly bruised. Both legs were broken, his skull split open, and his flesh torn and mangled. At the first turn of the shaft after he was caught, he must have received his death wounds.

A GOLDEN WEDDING .- The event hinted at in the Courier of Saturday, came off at the Lowell Island House on Saturday evening. It was the golden wedding of Mr. and Mrs. Joel Adams, recently of this city, but now of Chelmaford. Mr. Adams is the President of the Prescott Bank of this city, and nearly seventy-six years of age; Mrs. Adams is seventy-three. Upon this occasion Mrs. Adems wore the same white satin skirt in which she appeared at the original wedding. She was dressed as a youthful bride, with bouquets, &c. About seventy-five persons were present at the anniversary, and successively congratulated the couple.—Lowelt Courier.

CROCKETT'S LOG CARIN .- On the Mobile and Ohio Railroad, not far from Jackson, in Tennessee, says an exchange paper, still stands the humble log cabin, eighteen by twenty feet in size, built and eccupied while he lived in the district by the far-famed David Crockett. mational emblem of Scotland:

When the Danes from England invaded Scotland, they availed themselves of the pitch darkness of night to attack the Scotland, they availed themselves of the pitch darkness of night to attack the Scotland, they availed themselves of the pitch darkness of night to attack the Scotland, to prevent their tramp being heard, one of the Danes trod upon a large prickly thistle, and the sharp cry of pain which he instinctively uttered, suddenly apprised the Scots of their danger, who immediately ran to their arms and defeated the for with great slaughter. The thistle was thenceforward adopted as the national insignia of Scotland.
